SUMMARY

Systems-focused Unreal Engine developer with experience across gameplay, AI, and backend-integrated features for mobile and PC. Skilled in scalable pipelines and cross-functional collaboration for live and prototype projects.

WORK EXPERIENCE

INTERN UNREAL DEVELOPER

(21/11/2022 - 05/06/2023)

People Tech Group, Hyderabad.

- Delivered 3 client HMI prototypes in UE5, enabling interactive 360° car visualizations.
- Collaborated with a 5-person team on a dynamic speed gauge UI, enhancing automotive scenario visuals.
- Led GitHub workflow rollout for 8 animators, standardizing version control and boosting adoption by 80%.

JUNIOR UNREAL DEVELOPER [\[GAME LINK\]](#)

(14/08/2023 - 26/04/2024)

Koolgen Interactives, Hyderabad. (REMOTE)

- Built modular combat, locomotion, camera, and stealth systems using UE5 Component architecture and Animation Layers, ensuring scalable 60fps transitions.
- Showcased game demo at IGDC, engaging 200+ professionals and securing multiple partnership leads.
- Designed Enemy AI with UE5 Behavioral Trees/Blackboard for patrol, chase, combat, and search cycles.

UNREAL ENGINE DEVELOPER [\[GAME LINK\]](#)

(09/01/2025 - 30/08/2025)

Nextwhat Games Tech LLP, Hyderabad. (REMOTE)

- Architected C++ authentication & transaction system for a mobile cricket game (closed beta), ensuring secure login flows and user verification via backend API integrations.
- Developed a C++/Blueprint UI framework with reusable widgets, cutting duplicate code by 40% and enabling seamless dev-to-prod environment switching.
- Optimized performance with selective animation loading for bowlers, reducing memory use by 25% and eliminating bulk asset loads.
- Implemented dynamic fielder positioning system to create realistic batting pressure.

GAME DEVELOPER (CONTRACT)

(01/10/2025 - PRESENT)

Cephacon Games. (REMOTE)

- Contributed as a Gameplay Programmer on an Unreal Engine 5 souls-like action RPG within a 3-person team, shipping to an investor demo milestone.
- Extended a company-built combat plugin to implement combo sequences, hitbox tuning, and combat balancing, supported by Animation Blueprints integrated with combat states for responsive gameplay-driven animations.
- Built AI combat logic for one of two enemy archetypes using Behavior Trees, Blackboards, Tasks, and Decorators.
- Engineered a custom audio management plugin replacing direct asset pointers with FName tag-based routing through a centralized Audio Subsystem, with dynamic load/unload support and clean C++/Blueprint boundaries across the project.
