## SUMMARY

Unreal Engine developer with 3+ years of professional experience shipping games and interactive applications across mobile, PC, and automotive HMI. Owns systems end to end in C++ and Blueprint across combat, AI, animation, UI frameworks, backend API integration, and plugin development. Delivered production work across small remote teams and presented live at IGDC 2023.

## WORK EXPERIENCE

### **GAME DEVELOPER (Contract)**

**Oct 2025 – Mar 2026**

Cephacon Games | Remote

*3-person team – Souls-like action RPG in UE5. Shipped to investor demo milestone.*

- Extended a company-built combat plugin to implement multi hit combo sequences with per hit hitbox tuning and damage balancing balanced iteratively through playtesting.
- Integrated Animation Blueprints tightly with combat states to drive responsive attack, reaction, and transition animations across all combat states.
- Built complete AI combat logic for one enemy archetype using Behavior Trees, Blackboards, Tasks, and Decorators, keeping behavior extensible through condition based task and decorator logic rather than hardcoded state.
- Engineered a custom Audio Management Plugin replacing direct asset pointers with FName tag based routing through a centralized Audio Subsystem with dynamic load/unload support.
- Designed a clean C++/Blueprint boundary so audio designers could wire sounds in Blueprint without touching the underlying C++ routing logic.

## **UNREAL ENGINE DEVELOPER**

**Jan 2025 - Aug 2025**

**Game Link: <https://cricbattlegame.com>**

Nextwhat Games Tech LLP | Hyderabad (Remote)

*Mobile cricket game (CBG Cricket Battleground) – live on Google Play Store.*

- Architected OTP based authentication connecting UE5 to a live REST backend with session persistence via USaveGame and server validated token relaunch confirming session validity at every relaunch point.
- Designed a three layer HTTP architecture separating request construction (helper class), response parsing (manager layer), and Blueprint assignable delegate exposure (controller layer) so gameplay and UI classes never handled raw HTTP calls.
- Built a C++/Blueprint UI framework using UMG with reusable widget components, cutting duplicate widget code by 40% and including environment switching for seamless dev to production backend changes.
- Implemented on demand data fetching per UI section to eliminate redundant network calls and keep startup performance clean.
- Profiled bulk animation asset loading as the primary performance culprit, implemented selective on demand loading, reducing memory usage by 25% and eliminating startup load spikes.

## **JUNIOR UNREAL ENGINE DEVELOPER**

**Aug 2023 - Apr 2024**

**Game Link: <https://store.steampowered.com/app/2640810/Tridasha/>**

Koolgen Interactives | Hyderabad (Remote)

*PC action-adventure – Tridasha. Presented at IGDC 2023 to 200+ industry professionals.*

- Built modular combat, locomotion, and camera systems using UE5 Component architecture so each system could be iterated independently without creating cross-system breakage.
- Owned Animation Blueprint end to end using Linked Anim Layers with a bIsInCombat flag to swap between locomotion and combat layers with stable 60fps transitions.
- Built stealth detection layering AI Perception (sight and sound) with dot product rear arc checks for assassination prompts, with player intent respected by forcing normal attacks when a weapon was already drawn.
- Designed enemy patrol, chase, combat, and search behavior cycles using Behavior Trees and Blackboards with discrete tasks and decorators rather than monolithic logic.

## **INTERN UNREAL ENGINE DEVELOPER**

**Nov 2022 - Jun 2023**

People Tech Group | Hyderabad (Onsite)

*Automotive HMI – UE5 real-time interactive prototypes, external client delivery*

- Delivered 3 client HMI prototypes in UE5 enabling interactive 360° automotive visualizations for external client review.
- Collaborated with a 5-person team to build a dynamic speed gauge UI for real-time automotive scenario visualization.
- Led GitHub workflow rollout for a team of 8, standardizing version control practices and increasing adoption by 80%.

# PERSONAL PROJECTS

## **MODULAR SAVE SYSTEM (UE5 PLUGIN)**

<https://github.com/Kshitij1919/ModularSaveSystem>

- Packaged UE5 plugin with a three layer architecture: ISaveableInterface defines the save/load contract so the subsystem never casts to concrete types, USaveSubsystem (GameInstance Subsystem) owns all logic as the sole entry point, and USaveGameData holds a TMap backed data container.
- Per actor versioning using stable FGuid keys with OnSaveVersionMismatch migration so one actor format change does not invalidate any other actor's save data.
- Blueprint helper nodes for FString to bool and FString to Enum conversions with safe fallbacks, handling invalid input where UE5 native nodes do not.
- Clean success/failure returns on all save and load operations with persistent slot registry management across sessions.

**[MORE PROJECTS : <https://github.com/Kshitij1919?tab=repositories>]**

# SKILLS

## **INTERPERSONAL SKILLS**

Innovative thinking, Attention to detail, Initiative driven, Team work, Team leadership.

## **TECHNICAL SKILLS**

C, C++, Unreal Engine Blueprint, C#.

## **UNREAL ENGINE SYSTEMS**

Behavior Trees, Blackboards, Tasks & Decorators (AI).

Animation Blueprints, Linked Anim Layers, State Machines.

UMG / Widget Blueprint. GameInstance Subsystems, Game Mode/State/Player State.

HTTP Module, JSON, API integration.

Plugin development.

## **SOFTWARE EXPERIENCE**

Unity 2D/3D, Unreal Engine, Visual Studio, JetBrains Rider, Git/Github.

# EDUCATION

**SSC (10th)** Narayana Vidyalayam (2011 - 2012)

**HSC (12TH) (PCM- ELECTRONICS)** VIDYA NIKETAN JUNIOR COLLEGE (2012 - 2015)

## **B. TECH (INFORMATION TECHNOLOGY)**

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY. (2015 - 2019)

**ADVANCE DIPLOMA (GAME DEVELOPMENT & DESIGN)** BACKSTAGE PASS (2021 - 2022)

## ACHIEVEMENTS

### **EVENT HEAD** [\[CERTIFICATE LINK\]](#)

LAN Gaming at Cynosure 2019, Tech Fest at Dr. Babasaheb Ambedkar Technological University.

### **MANAGEMENT SECRETARY** [\[CERTIFICATE LINK\]](#)

IT Department (2018 - 2019) at Dr. Babasaheb Ambedkar Technological University.

### **EVENT COORDINATOR** [\[CERTIFICATE LINK\]](#)

LAN Gaming at Cynosure 2018, Tech Fest at Dr. Babasaheb Ambedkar Technological University.
